## EDUCATION

**National Institute of Technology, Delhi—B.Tech** 2019-2023 (Expected)

→ Graduation in 2023 (in the background of ECE), Current GPA 8.02/10

**Board of Secondary Education—12<sup>th</sup>** (RBSE, 92.80%, 2017-2018)

## INTERNSHIP EXPERIENCE

**PrepBytes ( E-Learning ) — Doubt Mentor Intern** Oct 2021 - PRESENT

- Data Structure and Algorithm (effect: improved Problem-Solving skill)
- Mathematics Problems, Regarding languages like C, C++, JavaScript

**Eamvey — Web Development Internship** June 2021 - Aug 2021

- We did work on the API calls by using ajax and node-Js
- Backend is divided according to the theoretical concepts (MVC model). From this, I have learned that how can we divide a large code file into small code files so that it is easy to maintain, edit, scale. I did also learn that how we can write a clean and arranged code.
- I did also learn that how is code sharing occurs b/w the engineers and what is the use of putting code into different files.

## PROJECTS

- JavaScript Code Evaluator(frontend)  
This is a Full stack project for evaluating the java-Script Code. It is done with the help of base64 encoder and an encryption method.
- To-do-list Project (frontend + Backend)  
This project is totally based on API's using ajax and node-Js
- Resume Website and a nice & responsive calculator(frontend)  
This project is done by html, CSS, JavaScript, framework
- Chatting App By using Socket.io(Backend)  
This is a backend project using sockets and node-Js
- A Nice and responsive box game(frontend)  
This is a nice game of moving blue box without colliding with red box.

## SKILLS

Problem Solving Skill

Web Development

C / C++ Language

Linux

Html , CSS , JavaScript

AJax and API, Socket.io

jQuery, Bootstrap,

SQL, MongoDB

Nodejs, Express

Object-Oriented  
Programming

## Certificates and Courses

Master Competitive  
Programming Course

- 15 May - 30 Aug
- PrepBytes

Full Stack Web  
Development

- Udemy

Volunteer at football  
Club at Nit Delhi
